

PROFILE

To obtain a responsible position that best utilizes my skills and provides opportunities to grow my technical and managerial skills, enabling me as a fresh graduate to grow while fulfilling organizational goals.

EDUCATION

BTech | MIT Academy of Engineering , Alandi | CGPA 7.93

2019 – 2023

Higher secondary |St. saviours highscool | 80.77%
2017 – 2019

Secondary | Renavikar school | 90.60%
2017

PROFESSIONAL EXPERIENCE

Suven Technologies, Software Engineering Intern
07/2022 – 10/2022 | Mumbai, India

- Worked on the platform using JavaScript function.
- Contributed to Optimised codes for **Cross Browsing platforms.**
- Maintained **client-side Framework** with the help of libraries.
- Worked with **Javascript** for large scaling problems and **ES6** compatibility.
- Worked on **React.js** library for the frontend part.
- Used React tools like **Redux, Webpack, and Next.js.**

SKILLS

Coursework

Data Structure Algorithms | OOPs | Database management system (DBMS) | Machine Learning

Programming Language

Java

Front-End framework

React.js

INTEREST

Cricket , Drawing , Esports

PROJECTS

Flash Type ✍

- A platform for testing your **typing speed**. In about **1 minute**, you can test your typing speed.
- You will also be notified if you type the incorrect words.
- **React life cycle method, react timer, react state, react props**, and other technologies are used. It is the best place to increase your typing speed and accuracy.

Smart Board ✍

- Made a personal open board using Canvas. **Real-time pencil, erase, sticky notes**, etc functions are implemented.
- Made use of **Javascript** for real-time mouse-up and mouse-down functions. Technologies like **socket.io, tools.io**, etc are used.

Malicious Activity Detection Algorithm

- Project classifies malicious and benign URLs with help of a machine learning classification concept.
- Used **random forest** classification algorithm for maximum **accuracy**.
- Model is built using **Python**.

ACHIEVEMENT

- LeetCode : Solved 200+ problems
- Secured 412th rank out of 14850 in Netwon's Coding School contest
- Secured 4th rank in hacker-rank 10 days challenge organized by Codechef MITAOE.
